LEMON BOTTLE

HOW TO SPOT A GENUINE LEMON BOTTLE

Attention all Lemonbottle customers,

We would like to inform you about the increasing presence of counterfeit Lemonbottle or scammers in the market.
As you know, Lemonbottle is a premium fat dissolver product, formulated by Korean dermatologists after extensive medical research. The product is designed to be safe and effective, with no harmful side effects.

To combat this issue, the brand owner SID Medicos has introduced a QR Code on the genuine LEMONBOTTLE.
This code will help you identify whether the product you have purchased is authentic or not.

Attention: This is the official link.
Any other links are counterfeit.

1. Look for the QR code sticker on the Lemonbottle's packaging.

2. Scan the QR code sticker with your smartphone camera.

3. The QR code will direct you to a website that verifies the authenticity of the product.

4. If the product is genuine, the website will display a message confirming its authenticity.

We urge all our customers to be vigilant when purchasing LEMONBOTTLE online and only purchase from authorized dealers. Always check for the hidden tag to ensure that you have received a genuine product. If you are in doubt, please contact us directly, and we will assist you in verifying the product's authenticity.

Stay safe and protect your health by only purchasing genuine LEMONBOTTLE.

Sincerely,

TEAM LEMONBOTTLE

SID MEDICOS
